

MailTight - Blackberry LogicMail Configuration

LogicMail Configuration Guide for Blackberry Devices

Download LogicMail

LogicMail - Over The Air (OTA) Installation

Download Link - <http://logicmail.org/ota/>

Select Download

Select the application Icon

Select the application ICON - cont.

It might also appear in the Downloads Folder

New account setup

A screenshot of the 'New account setup' screen. The title 'New account setup' is at the top. Below it are four input fields: 'Account name:', 'Your name:', 'E-Mail address:', and 'Account type:'. The 'Your name:' field has a small grey text below it that reads 'Name that appears in the From field of email messages that you send'. At the bottom, there are two buttons: 'Cancel' and 'Next >'. The 'Account type:' dropdown menu is currently empty.

New account setup screen will appear

New account setup details

New account setup

MailTight

Your name:
Joe Smith

Name that appears in the From field of email messages that you send

E-Mail address:
jsmith@mailtight.com

 IMAP POP

Cancel Next >

Account name: Joe Smith (this is your display name that will appear in the From field of email messages that you send)

E-Mail address: this is your actual email address.

Account type: Please select IMAP or POP

Press *Next* when complete

Incoming Mail Server Configuration

The screenshot shows a dialog box titled "Incoming mail server" with a black header bar. The dialog contains the following fields and controls:

- Use secure connection:** A dropdown menu with "SSL" selected, highlighted by a red rectangular box.
- Port:** A text input field containing the number "993".
- Username:** A text input field containing the email address "jsmith@mailtight.com".
- Password:** A text input field containing ten asterisks "*****" with a blue cursor at the end.
- Footer:** A grey bar containing the text "If blank, you will be prompted when connecting" and three buttons: "Cancel", "< Prev", and "Next >".

Select: SSL

Port: 993 (default)

Username: this is your email address

Password: enter your password

Outgoing Mail Server Configuration

LogicMail - Outgoing (SMTP)
Account name: MailTight

Server: send.mailtight.com

Use secure connection: SSL ▼

Port: 465

Authentication: PLAIN ▼

Username: jsmith@mailtight.com

Password: *****

Connection method: Direct TCP ▼

Use WiFi if available

Server: send.mailtight.com (this is also known as the Outgoing mail server)

Use secure connection: SSL (default)

Port: 465 (default)

Authentication: PLAIN (default)

Username: this is your email address

Password: use the password supplied with your account

Connection method: Direct TCP - This is important, this allows for direct communication from the Blackberry to the MailTight servers without going via Blackberry e-mail servers

Miscellaneous

The screenshot shows a configuration window titled "Miscellaneous". It contains two dropdown menus for "Refresh on startup" and "Refresh frequency", both set to "Never". Below these are two checkboxes: "Auto startup" (unchecked) and "Show notification icon on homescreen" (checked). At the bottom are three buttons: "Cancel", "< Prev", and "Next >".

The following configuration screen will appear.
Press *next*

Connection Settings

The screenshot shows a configuration window titled "Connection settings". It features a list of radio button options: "Use default setting" (checked), "Auto", "Direct TCP" (highlighted with a red rectangle), "MDS", "WAP 2.0", "WiFi only", and "Use WiFi if available" (checked). At the bottom are three buttons: "Cancel", "< Prev", and "Next >".

If this screen appears, you should check to see that Direct TCP is set.
It is highlighted as a red rectangle in this example.

Connection method: Direct TCP - This is important, this allows for direct communication from the Blackberry to the MailTight servers without going via Blackberry e-mail servers

Press *next*

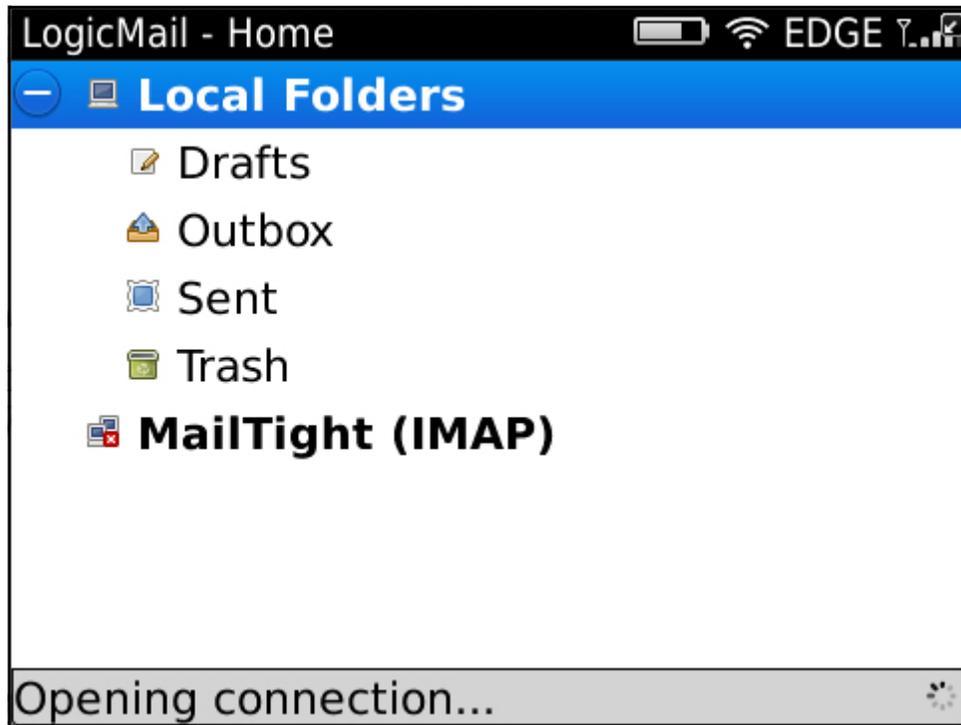

Test Configuration

Test successful will be displayed.

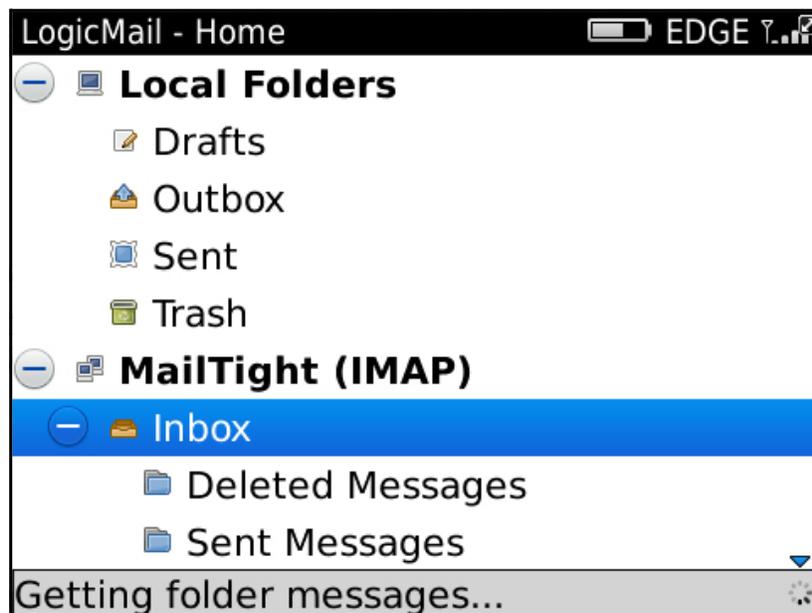

If the test unsuccessful, please follow step

- Connection Settings to ensure that **Direct TCP** is selected.

The Home screen will appear and the MailTight folders will appear under **MailTight (IMAP)**
This might take a few seconds while the inbox synchronises with the mail server

MailTight (IMAP) folder display

This screen will appear and the inbox folders will be displayed.
LogicMail is ready to use.
